## 1951 Greetings to Our Poultry Friends

This year we have many factors favoring the success of our friends in the poultry industry. The comparatively low volume of pullet chicks sold in 1950 which will almost certainly account for a shortage of eggs in 1951 resulting in higher price levels throughout the year. The misfortune of two sister provinces suffering from ravages of floods and disease at a critical period in their production of baby chicks has made the situation even more acute.

On the brighter side of the picture feed grains are much more plentiful and cheaper. This will bring the cost of maturing birds and the production of eggs to a lower level, leaving a larger margin of profit for the poultryman to put in his own pocket.

One might wisely conclude that the goal to aim for, to increase his cash returns, would be a **longer** laying season. Here's where the right thinking poultryman will cash in by placing his order six or even eight weeks in advance for early delivery of his chicks.

The purchase of **day old** chicks appears to be the trend for the 1951 season. Customers are finding that chicks started in their own brooders are tougher and more resistant to disease than those started in batteries. Chicks started in hatchery brooder rooms for two or three weeks where temperature is automatically controlled day and night, then through shipping are suddenly exposed to extreme changes in temperature are apt to suffer some damage.

Day old chicks being able to live for 48-hour period after hatching, on their own substance, so conveniently provided by nature, are able to stand shipping a long distance with no damage whatsoever. As a co-operative organization for the benefit of yourself and your Co-op Hatcheries we would strongly recommend that you order day old chicks for your own protection.

Since the Co-op Label has long been a symbol of quality on a box of Co-op baby chicks or turkey poults, it gives a vital meaning to our slogan: "It Pays To Raise Co-op Chicks and Poults."

Yours for a successful poultry season,  
Your Farmer Owned,

CO-OP HATCHERIES.

## BROAD-BREASTED BRONZE TURKEY POULTS

Through special efforts of the management and with view to safeguarding a future supply, all our turkey eggs are supplied from our own Alberta breeders. The turkeys from these flocks are Broad-Breasted Bronze, considered the best meat type and hardiest of all breeds.

Each individual bird is approved and blood tested by Government inspectors indicating they are true to type and conform to the high standards set by the authorities.

These high quality Co-op Broad-Breasted Bronze poults will be available from March to end of June. Please order six to eight weeks in advance to assist in our operations.

## CO-OP R. O. P. SIRED WHITE LEGHORNS

The Co-op ROP Sired White Leghorns are especially selected from the highest producing strains that were originated by some of the best breeders in Canada. The pullets are quick to mature and require less housing space than other breeds. They are frequently laying at four or five months of age with little or no broodiness, thereby being the most constant producers. The large eggs are snow white and make a very attractive display in the retail markets.

White Leghorn cockerels are the first on the broiler market, maturing early and are most delicious served from the frying pan.

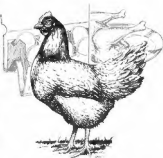

The Co-op White Leghorns are large body type of bird which stand the strain of heavy production with minimum loss. To the poultryman interested in obtaining the highest level of egg production throughout the year, we conscientiously recommend our Co-op ROP Sired White Leghorn pullets.

*Place Your Order Early and Reap the Benefit  
of a Long Laying Season*

## CO-OP R.O.P. SIRED NEW HAMPSHIRE

The New Hampshire, often called "The Business Fowl of Canada," is especially suited to our Western climate because of quick growth and fast feathering characteristics. Add to this their ability as an egg producer and their high quality meat as a table bird and you have a breed that is hard to match in the dual purpose class. We were fortunate in being able to have all our New Hampshire hatching egg flocks mated with ROP males, thereby producing the high quality ROP Sired chicks.

In previous seasons quite large numbers of this breed were shipped in from outside Alberta. For this reason we advise ordering your New Hampshire "Reds" early.

## CO-OP APPROVED LIGHT SUSSEX

The Co-op Hatcheries are pleased to report the splendid response to their announcement that Light Sussex chicks will be hatched at all our branches. There was a decided increase in the number and size of the orders for these beautifully marked white-fleshed heavy breed birds. Since then customers' comments of praise and satisfaction have been very gratifying. They have brought to our attention their high egg production, frequently as high as 80%.

This year the Co-op Hatcheries through their policy of Co-op chicks from 100% Alberta Hatching eggs are in an even better position to supply you with this popular breed. It would be good sound business to place your order well in advance for Light Sussex.

### STANDARD WEIGHTS

Male .....	9 lbs.
Female .....	7 lbs.

# CO-OP CROSSBRED CHICKS

These thrifty layers are produced by crossing a pure-bred White Leghorn female with pure-bred New Hampshire males. The Co-op also has the opposite cross. We have the ROP Sired and Approved sired in the Cross-breeds this season. First crosses have long been known to inherit the leading characteristics in each breed. This accounts for their fast growth and quick maturity into early layers.

The cockerels are very desirable as broilers, being medium weight and fast feathering are easy to dress, making a very attractive table bird. "Customer Satisfaction" is what we hear from the sale of Co-op Cross-breeds all over the country.

Advance orders for Cross-breeds have a priority over late orders, so please order early.

## CO-OP R. O. P. Sired BARRED ROCKS

Barred Rocks, easily identified with their black and white barred feathers (gray) have great popularity as an all-round farm bird. They are the heaviest of the popular breeds and have the most desirable body type as a market bird. They are hardy, vigorous rustlers, and make rapid gains in weight. They are good layers producing a large brown shelled egg.

Placing your order well in advance guarantees delivery of this well known breed of chicks when you want them.

### STANDARD WEIGHTS

Male	9	lbs.
Female	7½	lbs.

# CO-OP R.O.P. SIRED RHODE ISLAND REDS

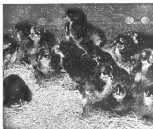

The Rhode Island Red is well known as a good general-purpose fowl. It is a good egg producer, laying large brown eggs. Its feathers are a deep chestnut red with rich lustrous greenish black sickle feathers in the cockerel and black tail feathers in the hen. The Co-op has a large number of customers that demand these Rhode Island Red chicks from year to year. Be sure to order early.

## STANDARD WEIGHTS

Male	8½ lbs.	Female	6½ lbs.
------	---------	--------	---------

# CO-OP WHITE ROCKS

This is an excellent dual purpose bird, is very popular as a meat fowl and a very good layer. The eggs are large and brown shelled. The standard weights are the same as the Barred Rocks. Male 9½ pounds, female 7½ pounds. This breed is available in limited quantities from our Edmonton and Calgary hatcheries.

## *Please Place Your Order Early*

Send a 10% deposit with your order. If there is an agent at your station your Co-op chicks may be shipped C.O.D. for the balance due. If there is no agent at your station, the full amount due, plus express charges, must be forwarded before shipment can be made. The Co-op reputation for service assures you that your Co-op chicks will reach you on the date and train specified—you can plan your work with confidence. Co-op guarantees to protect you against losses in transit.

**WE GUARANTEE:** 100% live arrival at Station destination when chicks are shipped by railway express.

**WE GUARANTEE** 96% accuracy in our chick sexing.

**WE GUARANTEE:** That chicks shipped from our hatcheries will be as represented in our advertising.

# Check These Items

Careful planning is an important factor in the successful raising of baby chicks. Check over this list and see if there is anything further that you will need for your brooder house, before you send in your order.

1. *New Brooder Wafers.*
2. *Two Pounds of Chick Starter for each Chick.*
3. *Fountains---Three per Hundred Chicks.*  
(Quart Size or Larger)
4. *Ren-O-Sal ---2 Tablets per Chick.*
5. *A Brooder Thermometer.*  
Keep temperature at 95 first week. Decrease gradually.
6. *Enough Feeders to Give Each Chick One Inch of Feeder Space.*
7. *A Chimney Cap for Your Brooder Stove.*
8. *Disinfectant for your Brooder House.*

# NATURAL GAS BURNING FLOOR BROODERS

**500 CHICK SIZE ONLY. — WRITE FOR PRICES**

# ELECTRIC FLOOR BROODERS

**300 AND 500 CHICK SIZES — WRITE FOR PRICES**

## DR. SALSBUARY'S GERMEX

Stainless, tasteless, disinfectant, bactericide. As an aid in the control of Newcastle disease.

Powder 15 oz.	\$2.10
32 oz.	\$3.25

## BUCKEYE BLAZER

The "Buckeye" "Blazer" is a heavily constructed blast-burner oil-burning brooder. The double drum is constructed of heavy blue steel, double beamed, with corrugated top and bottom to increase radiation capacity. Outer drum detachable for cleaning. Spun glass kindling ring in burner insures quick starting, complete combustion, and safe regulation of low flame. The "Buckeye" name is famous for reliability and long service.

500 chick capacity, weight 59 lbs. **\$24.75**

## FLOAT VALVES

Buckeye float valve of solid brass that cannot rust or clog. Fits  $\frac{1}{2}$ " or  $\frac{3}{4}$ " pipe. Can be connected to pressure system, tank or barrel. Weight 8 oz., packed easy to a carton. Can be shut off for cleaning water container.

No. 1552A **\$1.00**

## Catching Hooks

Made of one-piece galvanized spring steel rod with a sure-catch loop hook, and fitted with hardwood handle.

No. 435, **.85** each

## Play Safe—Install New Brooder Wafers Now!

Well made brass wafers, triple tested to ensure accuracy, specially treated to prevent corrosion. Filled with pure ether. Reinforced at all points where extra stress occurs. When ordering, specify for coal or oil stove.

No. 872—for all brooders **.45**

## SILCOO FUEL OIL TANK SOLVENT

Oil burner efficiency depends upon a clean system. Silcoo Fuel Oil Tank solvent cleans tanks, clogged pipe lines, strainers, filters, and burners by dissolving sludge and gum formations, and by dispersing completely water accumulations due to condensation.

Silcoo Tank Solvent is non-inflammable, non-toxic, non-corrosive—always safe to use. Ideal for use with oil-burning brooder stoves.

One quart Can **\$1.00**

## MOORE THERMOMETER

Variation of a few degrees in brooding temperature can often mean the difference between success and failure for the poultry raiser. Use this accurate, dependable brooder thermometer. Has scale and numerals in black for easy reading. Registers from 18 below zero to 120 above. No. 200 Each. **\$3**

## PRATT'S ROOST PAINT

A modern poultry lice and mite killer which contains nicotine in a special activated oil base. Simply apply a thin strip of Pratt's Roost Paint on top of the roosts, and deliver your flock without handling a bird. For miles, tie or tack a cloth saturated in Pratt's Roost Paint around the end of each roost.

8 oz.	<b>\$1.00</b>
16 oz.	<b>1.75</b>
32 oz.	<b>3.25</b>
<b>POULTRY INHALENT</b> spray to treat birds.	
8 oz.	<b>.50</b>
16 oz.	<b>.85</b>

## PRATT'S PIC-NO-MOR

Stops cannibalism, toe, vent and feather picking in baby chicks or adult fowls. A bright red substance that is better tasting. Stops bleeding and starts the healing process.

2-oz.	<b>\$ .40</b>
6-oz.	<b>1.00</b>
16-oz.	<b>2.00</b>

**CHICK TABLETS** — Purple tablets for drinking water medication.

1 oz.	<b>\$ .50</b>
100 tablets	<b>1.25</b>

## Welded Wire Egg Baskets

Built of steel wire welded at 100 points. Shaped to prevent breakage of eggs. Has steel handle to protect legs and other in griping. Cap only 18 dozen eggs, weight 3 lbs. No. 234R **\$1.75**

## SEALER DRINKING FOUNTS

Heavily galvanized metal drinkers to be used with expert or ball-piston nozzles. Simply fill the sealer with water, place the lower base on and turn over. Next can be used for milk or any acid. Price does not include glass sealer No. 126 each. **15**

## DO A BETTER JOB—QUICKER

## "JIFFY-WAY" EGG GRADING SCALE NOT ILLUSTRATED

### ACCURATE · DEPENDABLE · LASTING

Seven reasons why the Jiffy-Way Egg Scale and Grader weighs eggs accurately and separates poultry raisers to receive from 3 to 10 cents more per dozen, as compared with eggs not graded and classified.

- 1 Scale has a 4-color zone dial (red, green, orange, yellow) with curves, easy to read figures showing weight and grade of egg.
- 2 Adjustable slip screw can be set to any weight desired for hatching eggs. A great time saver.
- 3 Special leveling device with polished bearings, and no springs assure accuracy in weighing and grading eggs.
- 4 Large egg cup assists in protecting against egg breakage.
- 5 Weights and grades eggs from 18 to 30 oz. per dozen instantly and accurately.
- 6 Simple and easy to operate makes egg grading easy for children or women in the morning or evening.
- 7 Rigidly constructed of 22-gauge steel. Baked enamel finish, will give years of service.

No. 316 S&S Individually Boxed.

Weight 1 1/2 lbs. Price each

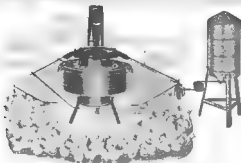

**\$1.75**

## MAGIC EGG BRUSHES

Indispensable for dry cleaning eggs. Reasonable every cloth over a sponge rubber cushion securely attached to sturdy wooden handle.

No. E92 egg brush, each	<b>.55</b>
No. E93, entry cell, each	<b>.10</b>

# Brower Twin Blast Oil Brooders

## TWIN-BLAST One of the Safest

Brower's Improved Imperial Twin-Blast Brooder is one of the finest Drum Oil Brooders on the market. It is recommended for many brooding purposes and is especially ideal for cold weather brooding. When it comes to radiating heat, few Stoves compare with it. It warms the whole house—not just the area under hower. It leaves no cold corners. With the Twin-Blast the chicks are not confined to a small brooding area. There is no huddling—no crowding. They run about at will, eat more and grow faster. Being economical in operation, the Twin-Blast is ideal for large flocks, yet operates cheaply enough for the small chick raiser. It is also suitable for turkey brooding. The Twin-Blast Burner is designed to get more heat out of the flame. It forces super-heated air over outside of flame ring. The center heating space between inner and outer drum gives increased radiation—position of canopy enables a natural movement of fresh, warm air downward on to chicks. The outer radiating drum long heat travel insures added efficiency by increasing the amount of heat extracted from the flame.

## TWIN-BLAST Combustion

The heart of Brower's Twin-Blast success is its patented burner. Oil enters into the circular or ring-like trough from which the vaporizing gases rise to mix with the twin columns of air entirely enveloping them. Operating exactly like the carburetor on your car, the burner thoroughly mixes gas with oxygen to secure perfect, clean combustion. Other burners pull the air over the oil, the Twin-Blast takes it both inside and outside of the oil ring. The better the mixture of air and gas, the better the combustion. This burner has a remarkably wide heating range. It will burn very low for warm weather, or, will really pour out heat when needed for cold or zero weather brooding. It needs no priming, has no wicks, can be relit with a match. A twist of the cleaner handle cleans burner. The Twin-Blast will run over six months without any need of cleaning.

# Monarch Coal Brooders

The Monarch is especially designed to suit Canadian climatic conditions, and will burn either coal or coke. There are two sizes, which accommodate 500 or 1000 day old chicks respectively. The canopies are sturdily built from galvanized iron, reinforced at the top with a cast iron ring and designed to provide an even distribution of heat with the least possible loss.

The cast iron stoves, with asbestos insulated bases, give uniform heat, once the thermos static control is set to the desired temperature. Simply remove the canopy and you have a very efficient room heater. Many Alberta poultrymen set up the Monarch stove in the laying blocks, and to keep dampness out of the house.

These stoves are also used with very satisfactory results as hog brooders. Several plans are available for the building of insulated Monarch-warmed hog houses, for starting winter litters.

Heat regulation is positive on the Monarch stove—standard expansion valves operate draft and check damper. The Monarch is a standard for value and reliability.

500 Chick size, 52 inch canopy, stove 22" high, shipping weight 95 lb. Price **\$14.35**

1000 Chick size, 56 inch canopy, stove 23½" high, shipping weight 110 lbs. Price **\$21.25**

## Brower Revolving Flue Cap

Used on top of smoke pipe stack, Brower's Revolving Flue Cap will increase the efficiency of any brooder stove. It absolutely eliminates the possibility of down drafts, as the vane turns with the slightest breeze. Also prevents driving rain or snow blowing down inside the pipe and interfering with regulation of fire and heat control. Made of rigid galvanized steel. Fits only 5" stovepipe.

No. 793 — Revolving  
Flue Cap, Dia. 5"  
Weights each 2 lbs.  
Price each **95c**

## G S W SNAP LINK STOVEPIPE

Eighteen-inch lengths of heavy-gauge blued iron stove pipe, packed in handy bundles of ten lengths. Pipe is set up by connecting handy snap links which give positive connection without the use of hammer or rivets. Impossible to collapse or expand when joints are fitted together. Made in Canada by General Steel Works. Five-inch pipe only, to fit all brooder stoves.

G.S.W. Snap-Link Pipe, bundle of  
10 lengths **\$3.50**  
Pipe Elbows, 5 inch. Each **.40**  
Dampers, 5 inch. Each **.25**

# Dr. Salsbury's Poultry Remedies

## VAPO-ROOST

Vapo-Roost is a roost treatment for lice which makes use of an entirely new louse-killing chemical (Benzene Hexachloride) which is much more effective and long-lasting than previous preparations. Vapo-Roost throws off fumes which require affecting up to two days after application.

Roosts need not be cleaned before the application. A few minutes work will treat an entire flock—no dipping or fasting of birds is necessary. Vapo-Roost is economical. In use, the contents of a single 16 oz. bottle covering 500 feet of roost space.

16 oz. --- \$2.40 32 oz. --- \$3.50

## Dr. Salsbury's CAN-PHO-SAL

Inhalant or nasal wash for poultry. May be used with vaporizer or spray in treatment of colds, coryza and roup in poultry. Can-Pho-Sal tends to loosen accumulations of mucus of poultry. Also recommended as a nasal wash.

4 oz. bottle \$1.50  
16 oz. bottle 2.75

## Dr. Salsbury's PAR-O-SAN

A disinfectant prepared specially for poultrymen. Par-O-San is a brooder poultry house, and general disinfectant which kills coccidia, worm eggs, lice and mites by contact. May be used as litter spray, a general disinfectant, a spray for killing mites, or as a delousing solution for poultry, hogs, cattle, sheep and dogs.

16 oz. --- \$1.50  
32 oz. 2.00

## DR. SALSBUARY'S

Wormin is a one or two-day flock treatment for the removal of large roundworms and oval worms in both chickens and turkeys. A palatable, time-saving, economical, effective treatment. Just mix with a small portion of finely ground feed and sprinkle over the mash.

Wormin contains nectine and phenothiazine, and is ideal for periodic treatments for ova worms which are very prevalent in Alberta. Wormin is packaged in various sizes to treat various size flocks.

100 Bird package \$1.40 250 Bird package \$3.00

## DR. SALSBUARY'S ROTA-CAPS

An individual treatment for the removal of tapeworms, roundworms, capillaria worms and oval worms in chickens and turkeys. Rota-Caps have no harmful effect on the birds, they don't stop growth or knock egg production. Rotamine, the active medicine in Rota-Caps, is the product of years of research.

150 Caps -----\$1.75 300 Caps --- \$3.20

# Globe Poultry MEDICINES

## Kame-Glo

A combined mild astringent and laxative, liquid medicine to stimulate the appetite and promote rapid growth.

8 ounce bottle --- \$ .75  
40 ounce container 2.25

## Avo-Late Tablets

Helps prevent diarrhoea and other intestinal disorders. Used in drinking water for baby chicks and mature fowl. Drop tablet in any type of foam or waterer.

Bottle of 100 tablets \$1.00

## Globe Poultry Spray

An aid in the relief of colds in chickens and turkeys.

8 oz. bottle --- \$ .75

## Globe Lice Powder

For control of lice on poultry (not recommended for baby chicks)

12 oz. can --- \$ .75

## Turk-Glo

An astringent to be used in the drinking water for turkeys. Disinfects the drinking water as well as stimulating the appetite.

8 ounce bottle \$1.25

## Dr. Salsbury's Stop-Pick

A bitter red ointment for the treatment of cannibalism in chickens, packed in convenient tubes, like toothpaste. A drop squeezed on a picked spot heals the injury, and discourages further picking.

2 1/2 oz. tube 48c

# 5 and 8 GALLON FOUNTS

No. 75 is a five gallon fount made from 26 ga. heavy galvanized iron. Double wall. Vacuum sealed. Cone shaped top prevents roosting. Wide, deep drinking pan holds lots of water. Handle on inner and bail on outer tank. Weight 12 lbs.

Price each .....\$5.75

No. 78 is constructed like No. 75 but holds 8 gallons. Weight 14 lbs. Price .....\$7.15

## OIL HEATERS

No. 81 oil heater is made for the 5 and 8 gallon founts with large gallon size oil container. Complete with burner and wick.

Weight 6 lbs. Price each .....\$4.25

Steel Stand can be used with or without heater. No. 82, as illustrated. Price .....\$4.40

Aluminum Chick Feeder durable. Trough constructed entirely of heavy-gauge, spot welded aluminum, which will not rust or corrode. The trough is easily and quickly raised to desired height by adjustable wire legs and set screws. The special turned-in lip design of the trough prevents chicks billing out the feed. Width of trough 4 1/2", depth 2 1/4".

No. 349A—48 inches long, each .....\$2.70

No. 336A—36 inches long, each .....1.90

### PREMIER CHICK FEEDERS

Made from 28 gauge galvanized steel, stamped from one piece. Painted real top. Two sizes:

No. 61—20 ins. long, each .....65c

No. 62—32 ins. long, each .....88c

### Aluminum Chick Feeder

Aluminum feeder in the popular design, reduces feed waste, and is outstandingly

### PREMIER CHICK FOUNTS

One gallon glass jar with 8 1/4" pan into which wide mouth screws snugly. With stand, \$1.35

### **GALVANIZED PAIL FOUNTAIN**

The 2-gallon pail fount is a stand-by with poultry raisers.

No. 014. Price each ..... **\$1.35**

### **G5W CHICK FOUNT**

(Not illustrated)

Substantially made of galvanized metal. Bottom pan attaches to water container on glove-fastener principle. Simple to use—just fill the container with water, place the bottom pan on with a smart slap, then turn over. Capacity one quart. This fountain must not be used for feeding milk or acids of any kind.
